REPORT
ON THE QUALITY OF FOOD
SOLD IN CONNECTICUT - 1974
J. Gordon Hanna, Chief Chemist

Annual bulletins showing examination results for food collected from Connecticut markets and farms have been published by the Station since 1896. Publicized in this way, the results help to deter fraud and deception, and supply information that the consumer can use to select the most reliable brands and suppliers.

The Commissioners of the Department of Consumer Protection and the Department of Agriculture have the statutory authority to collect samples and prosecute violators. The laboratory results are reported to the Commissioners as soon as they are obtained to avoid delay in any enforcement actions required. Only official samples submitted by inspectors under the directions of these Commissioners are included in this report. The Station has no authority to prosecute violators.

Many of the listed foods were collected because they were already considered suspect, either by inspectors or by consumers. Therefore, the ratio of number of deficient samples to the total number examined is probably higher than if the sampling had been done on a completely random basis.

Fifty samples of milk submitted for vitamin D assay and 412 samples of milk submitted for pesticide residue analyses are not included in the tabulation. All of the vitamin D milk samples contained the required 400 USP units per quart. Three of the milk samples submitted for pesticide analysis had residues slightly in excess of the established tolerances.

Analyses for adulteration or for conformance to label claims were the basis for judging acceptability of many samples. In other cases, Connecticut and Federal definitions and standards of identity were used. Some of the regulatory requirements may be helpful in interpreting the data given.

Frankfurter and bologna are limited to 30% fat, 3.5% fillers (such as cereal, starch, soy products and nonfat dry milk), 10% added water and 200 parts per million nitrite. Hamburger must not contain more than 30% fat and pork sausage not more than 50% fat. All flour, bread, corn meal, grits and rice sold in Connecticut must conform to the Federal enrichment standards. For example, bread and rolls must contain the following in milligrams per pound: thiamin, 1.8; riboflavin, 1.1; niacin, 15.0; and iron, 8.0 to 12.5.

The significance of traces of pesticide residues in milk and other foods is evaluated by comparison with official tolerance levels established and reviewed periodically by Federal agencies. The established tolerance levels include at least a 100-fold safety factor, determined by physiological effects of each pesticide on test animals.

Organoleptic tests are used to evaluate food on the basis of odor, taste and appearance. They are normally conducted by a panel of three or more people.

The analytical work represented by this report was by R. Barger, R. G. Botsford, S. Christie, W. Glowa, L. Hankin, J. J. Hayes, L. G. Hornig, L. G. Keirstead, L. A. McLean, G. Smith, S. R. Squires and A. Wickroski. Insect examinations were by K. Welch, Department of Entomology. Clerical work and reporting were by B. Lindgren. The bulletin was typed by A. Ballou.

Following are the meanings of abbreviations used in the report:

MSG	monosodium glutamate
NFDM	nonfat dry milk
PPM	parts per million
P-OK	pesticide residues within tolerances
T-OK	organoleptic tests satisfactory

ANSONIAAmmonia Solution, Mallinckrodt, Strong

Laites North End Pharmacy, N. Main St.

WS-965. Ammonia, 3.57%

Deficiency: Low ammonia, 27-30% required.ASHFORDApples

Crooke Orchards, Bebbington Rd.

BRANFORD

Apples

Hilltop Orchards, E. Main St.
JW-2938. Baldwin. P-OK

Apricots, Dried Honey Dipped

Nature Food Centers of Conn., Branhaven Plaza
JC-67. Pesticide residue, sulfur.
Deficiency: Residue within tolerance for
normal food, but sample is claimed to
have been organically grown.

Beans

Stop & Shop, Boston Post Rd.
NG-2325. S&S Cut Green. Net wts. (2 cans)
16.1, 16.1 oz. (claimed 15 1/2 oz.)
fill satisfactory.
Nature Food Centers of Conn., Branhaven Plaza
JM-2669. Mong. Pesticide residues,
dieldrin and endrin.
Deficiency: Residues within tolerances
for normal food, but sample is claimed
to be "natural".

Broccoli, Top Frost Spears

Food Mart, Branhaven Plaza
JC-47. No evidence of insect infestation

Cider

Hilltop Orchards, E. Main St.
JW-2987. P-OK

BRANFORDCheese

Lisa Quality Foods Corp., 906 W. Main St.

JF-464. Deficiency: Insect infested.

JF-475. Contessa Romano. Water, 37.7%; ash, 7.20%; fat, 26.3%; milk fat in solids, 42.2%; lactose, none; nitrogen, 1.40%; pesticides, nothing significant.

Deficiency: Excessive water

Corn Meal

Nature Food Centers of Conn., Branhaven Plaza

JC-44. Elam's Yellow. Riboflavin, 0.58; niacin, 15.9; thiamin, 0.95; iron, 9.0 mg. per lb.; chlorinated pesticide residues, none.

Deficiency: Enrichment ingredients low.

JC-45. Shiloh Farms Yellow. Riboflavin, 0.49; niacin, 12.4; thiamin, 1.34; iron, 8.85 mg. per lb.; chlorinated pesticides, none.

Deficiency: Enrichment ingredients low.

JC-46. Olde Mill White. Riboflavin, 0.46; niacin, 10.0; thiamin, 1.37; iron, 8.48 mg. per lb.; chlorinated pesticides, none.

Deficiency: Enrichment ingredients low

Fruit, Mixed Dried Honey Dipped

Nature Food Centers of Conn., Branhaven Plaza

JC-68. Pesticide residues, chlordane and sulfur.

Deficiency: Residues within tolerance for normal food, but sample is claimed to have been organically grown.

Macaroni

Lisa Quality Foods Corp., 906 W. Main St.

JF-474. Primo Gnocchi, Bocconcini.

Riboflavin, 1.14; niacin, 9.42, 9.57; thiamin, 0.46, 0.66; iron, 2.90, 4.39 mg. per lb.

Deficiency: Enrichment ingredients low.

JF-495. Primo Spaghetti. Riboflavin, 2.23; niacin, 47.5; thiamin, 5.45; iron, 23.0 mg. per lb.

JF-496. Primo Gnocchi. Riboflavin, 1.58; niacin, 38.2; thiamin, 4.53; iron, 14.9 mg. per lb.

Meat

Stop & Shop, E. Main St.

JC-31. Hamburger. Fat, 22.8%; sulfite, 0.

Hardee's, W. Main St.

DT-2931. Hamburger. Fat, 20.5%; sulfite, 0.

Walt & Bill's Market, 2 E. Main St.

JW-16. Kielbasa. Protein, 13.5%; meat protein, 13.1%; water, 40.5%; added water, 0; NFD, 1.45% sodium nitrite, 84 ppm.

Rimca, Inc., 904 W. Main St.

JF-534. Cube Steak. No known methods for detection of added meat tenderizers.

Oil, Trinacria Blended Olive

Lisa Quality Foods Corp., 906 W. Main St.

JF-473. BHA, BHT and PG, none

JF-493. Contents (2 cans), 127.0, 127.7 fl. oz. (1 gal. claimed) squalene, 34.9, 60.3 mg per 100 g; estimated olive, 10-15%, 15-20% (25% claimed).

Deficiency: Low olive oil content.

JF-494. Contents, 128.7 fl. oz.; squalene, 65.2 mg per 100 g; estimated olive oil, 20%; butyro refraction at 25°, 69.3; specific gravity at 25°, .9165; mineral, peanut, cottonseed oils, none.

Deficiency: Not pure olive oil

JF-504. Squalene, 75 mg per 100 g; estimated olive oil, 23%; butyro refraction at 25°, 69.6; specific gravity at 25°, .9166; mineral, peanut, cottonseed oil, none; artificial color, none.

Deficiency: Not pure olive oil.

Olives, Lisa Select Ripe California

Rimca, Inc., 904 W. Main St.

JF-533. (6 cans, drained wt. 7.5, 8.0, 8.1, 7.9, 7.5, 7.6 oz., ave. 7.77 oz. 7 3/4 claimed); count 50, 54, 54, 52, 48, 51, ave. 51.5 (65 claimed)

Deficiency: Short count

Peaches, Rancher Waltenspiel Dried

Nature Food Centers of Conn., Branhaven Plaza

JW-2667. Pesticide residues, DDT, DDE, sulfur.

Deficiency: Residues within tolerance for normal food, but sample is claimed to be "natural".

Prunes, Dried Rancher Waltenspiel Dried

Nature Food Centers of Conn., Branhaven Plaza

JC-66. Pesticide residues, chlordane and sulfur.

Deficiency: Residues within tolerance for normal food, but sample is claimed to have been organically grown.
